

Dear Mr. Backes,

11/2/91

Thanks for the SASE.

I have not seen the A & E shows. I was promised a cassette but have not gotten it. So I'd appreciate the copy you offer, and on one cassette would be fine.

I would not agree to be interviewed by Nigel Turner until he assured me he would not do what he proceeded to do. I do not believe his Corsican story and believe that I debunked its beginning, many years ago, and I'm not now clear on that. I don't believe it.

I have no reason to believe that the Dallas conference will be in any way worthwhile. Those at the so-called information center there have so many theories none of which is proven or provable and almost all are irrational.

I do not subscribe to any of the newsletters and have never belonged to any of the organizations. I've met Jerry Rose and think he is a fine fellow. But I've seen some stuff I regard as atrocious in his publication.

It can bring together those you refer to as researchers but I do not apply that word to those who fool around with these endless and baseless theories. They have never bothered to familiarize themselves with the existing and dependable information that disproves these concoctions.

But I believe that most who attend those confabs enjoy and and I think you also will.

Thanks and best wishes,
